### EXPERIENCE

#### Software Engineer II, CareCloud

Miami, FL - Jan 2018 - Mar 2020

- UI lead for development of EHR features
- Helped redesign and rebuild company's core product Go, CareCloud's EHR/practice management app, with enhanced features and micro-service architecture
- Collaborated with product managers, designers and team leads in an Agile environment to break features down into digestible tasks using JIRA
- Developed component library with Storybook housing 20+ reusable, tested, custom components including checkboxes, inputs, selects, buttons complete with animations and accessibility
- Built features for doctors to capture patient data quickly and accurately using our custom components in JSON schema forms and validating inputs with HTML5 and custom client-side validations
- Developed a dynamic JSON-driven UI for documenting patient encounters with realtime data syncing for collaboration using Firebase's Cloud Firestore
- Migrated Go's front end to autonomous micro-apps using Single-SPA for maintainability, separation of concerns and to minimize obstacles for future iterations
- Created multiple drag and drop components for fun, interactive views
- Completed Breeze rewrite in React with a small core team within a 3-month deadline - CareCloud's award-winning patient portal app with over 20k users
- Built the UI for an internal tool to track daily automation tests
- Assisted team lead in maintaining UI consistency across feature teams through semi-weekly sync ups and team initiatives

#### Client Service Executive, PHD Media

Frankfurt, Germany - Sept 2015 - Sept 2017

- Converted clients' marketing objectives to digital media strategies across EMEA for a global partner
- Presented media recommendations, weekly reports and campaign analyses to campaign stakeholders
- Managed digital assets across major ad management platforms - Sizmek, DoubleClick, LinkedIn Ad Manager and Facebook Power Editor
- Client portfolio: SAP, Universal Pictures, Starbucks, Qatar Airways, Volkswagen and Newell Rubbermaid
