WORK EXPERIENCE

Software Engineer II, CareCloud

Miami, FL - Jan 2018 - Mar 2020

- UI lead for Go's EHR development, an EHR/practice management app, responsible for feature grooming, task delegation and two direct reports

- Migrated Go's React front-end to autonomous micro-apps, dramatically improving build times, maintainability and productivity while minimizing obstacles for future iterations

- Developed the company's first collaborative feature with real time data syncing in a dynamic, JSON-driven UI using Firebase's Cloud Firestore

- Drove consistency across apps by delivering a component library housing 20+ tested, reusable components using Storybook

- Ensured input accuracy of patient data with HTML5 and custom client-side validations in JSON-schema forms.

- Promoted continued learning and collaboration across distributed front-end teams through team initiatives

- Created multiple drag and drop components for fun, interactive views

- Completed Breeze rewrite in React with a small core team within a 3-month deadline – CareCloud's award-winning patient portal app with over 20k users

- Built a sleek UI for an internal tool in React to track daily automation tests

Client Service Executive, PHD Media

Frankfurt, Germany - Sept 2015 - 2017

- Converted clients' marketing objectives to digital media strategies across EMEA for a global parter

- Presented media recommendations, weekly reports and campaign analyses to campaign stakeholders

- Client portfolio: SAP, Universal Pictures, Starbucks, Qatar Airways, Volkswagen

VOLUNTEER EXPERIENCE

Front-end Developer, now-U

May 2020 - Present

- Developing React app for non-profit organization aiming to drive change through monthly-coordinated campaigns centered around social and environmental issues
